A WORLD OF WONDER

In the Kawartha Lakes

Pinnguaq is bringing award-winning STEAM (Science, Technology, Engineering, Art & Math) activities, publications, curriculum and FUN to the City of Kawartha Lakes.

It's a world-class opportunity for **parents** looking to ignite imaginations, and for **teachers** seeking innovative curriculum and content.

PINNGUAQ

There are believed to be more underwater microphones off the coast of British Columbia than anywhere else in the world.

STEAM ACTIVITIES FOR YOUTH

STEAM Skill Builds (After school, year-round)
After-school Skill Builds are 90-minute classes (one day a week, for five weeks) where youth aged 6-13 learn about a particular STEAM area of focus.

STEAM Discovery Days (Saturday Drop-ins, year-round)
Flexible Saturday sessions where youth aged 6-13 explore different steam activities each week from 10 am to 2 pm. Parents can drop off or stay and play (dependent upon the volume of attendees).

STEAM Creator Camps - (Summer & Winter)
Build knowledge, friendships and a HECK of a lot more at five-day STEAM education camps designed to create mad scientists and crazy creators (before & after care available).

All held at Pinnguaq's Lindsay Makerspace at 87 Adelaide St. North.

In June, Pinnguaq created, assembled and delivered over 7,000 maker kits to partner communities in Nunavut.

EDUCATOR STEAM RESOURCES

STEAM Maker Kits for Home & Classroom
Bring learning to life with STEAM Maker Kits. Each kit offers hands-on, play-based learning that ensures concepts are tangible, memorable and (most important), FUN!

SCHOOL VISITS (both ways!)
Bring your students to our Lindsay Maker Space for a STEAM outing that's aligned to your in-class curriculum and planned learning outcomes OR bring our team (and quite possibly our army of small robots) to your school to enrich learning. We also provide training for educators, so you can run Maker Kit sessions on your own.

Programs and content are subject to change - this world moves fast, and we try to keep up!

PINNGUAQ

ROOT & STEM MAGAZINE

Published twice-yearly, this celebrated, **FREE** magazine offers innovative STEAM content, curriculum and tools, focused on a central theme - Space, Oceans, Artificial Intelligence and more - including diverse perspectives from rural, remote and Indigenous communities. It's designed to bring a new level of STEAM engagement to K-12 classrooms.
